*This lock tester can be used on
most models of fifth wheels.*

Kingpin Gauge (TF-0110)

FAQs

When do I need to rebuild?

The rule of thumb is when the fifth wheel is at maximum adjustment and there is 1/8 inch or more kingpin movement.

Can my fifth wheel be too worn out to rebuild?

Yes, be sure to inspect your top plate before rebuilding. Use our handy checklist. Visit our website and refer to XL-SB058-01 - www.safholland.us
