# HOLLAND FWAL - THE WORLD'S LIGHTEST FIFTH WHEEL

The World's Lightest And Only Aluminum Fifth Wheel - Up To 100 Lbs. Lighter vs Standard Duty Equivalent

The HOLLAND FWAL Fifth Wheel was designed to increase your bottomline with larger payloads. With the combination of proven reliability of HOLLAND fifth wheels and the leading technology of ALCOA forged aluminum, the most innovative, lightweight fifth wheel in the world was created.

Built with the same aluminum grade as military tank and truck wheels, then forged in a 35,000 ton press and precision machined for unmatched strength and up to 100 lbs. of weight savings.

**LIGHTER** – Designed as the world's lightest and only aluminum fifth wheel. Up to 100 lbs. lighter than standard duty equivalent.

**REDUCED MAINTENANCE** – Designed with low lube technology to eliminate the need to grease the top plate and mounting brackets.

**PERFORMANCE GUARANTEE** – Guaranteed for 5 years/500,000 miles to provide maximum operation performance.\*

## HIGH DURABILITY LOCK SYSTEM

The advanced surface alloy treatment provides long wear life and dependable performance.

## NOLUBE ARTICULATION POCKET INSERTS

Reduces maintenance and has a long life.

## E-Z GRIP RELEASE HANDLE

Requires minimum pull effort and the drop handle design protects against damage during a missed couple.
