## **SAF-HOLLAND Introduces True Lube™ Landing Gear Grease and PH-405 Pintle Hook**

Muskegon, Michigan, JANUARY 28, 2019 – SAF-HOLLAND, a leading global manufacturer of trailer suspension and axle systems, truck suspensions, fifth wheels, landing gear, and coupling products, announced the introduction of its HOLLAND True Lube™ Grease and HOLLAND PH-405 Pintle Hook.

### **True Lube™ Landing Gear Grease**

True Lube™ grease, formulated specifically for HOLLAND landing gear to maintain the true, optimized performance through:

- Wide –40°F to 150°F operating temperature range ensures crank operation
- Excellent formula stability provides consistent smooth operation
- Corrosion and oxidation protection protect gears from corrosion
- Excellent oil bleed control reduces oil leaks and prevents grease hardening
- Salt Water resistance enables it to last in harsh coastal environments
- Excellent anti-wear and load carrying prevents gear and screw damage under heavy loads
- High-tech formula provides optimal performance efficiency

True Lube is available in 5-gallon pails, 14-oz. tubes, and 120-lb. drums.

### **PH-405 Pintle Hook**

The HOLLAND PH-405 pintle hook is an improvement on the proven PH-400 pintle hook. The robust PH-405 is manufactured with austenitic manganese steel for enhanced wear and is designed to work harden at contact surfaces with the drawbar. It's used with 2-3/8-inch drawbars on heavy-duty 'A' train (converter dolly) double and triple applications for bulk liquids, dry bulk, aggregates, and quarry materials.

The long life, rigid-mount design with an 8-bolt mounting pattern is compatible with our popular PH-400 model, and the Premier 2400, 100-4, and 470 models.

Backed by a 2-Year Warranty, the PH-405 pintle hook can be used with or without air chamber.
